Texture is one of the most reliable ways to add depth to a design. The eye is drawn to repetition of patterns and shapes, and it lingers on unexpected compositions. Get inspired by these uncommon yet striking materials and consider adding texture to invigorate your home.

Architect Matthew Coates designed this Bainbridge Island residence to reflect his client's personality. The exterior features an L-shaped concrete wall, which serves as a "hard, durable, impenetrable façade," explains Coates, while the home's ipe wood and custom patina copper are warmer, more inviting elements and accentuate the scenic views of the Olympic Mountains and Puget Sound.
